“I want to discover amazing music, find songs that match my mood, explore new artists, and enjoy a personalized listening experience with RYTHM.🎵”

Age	19 Years
Location	Chennai
status	Single
Education	UG
Occupation	UI/UX Desinger

Bio

Vasan is a 19-year-old college student from Chennai who is passionate about music and enjoys listening to different genres throughout the day. He uses music to match his mood, whether he is studying, travelling, relaxing, or spending time with friends. He wants a personalized music experience that understands his mood, activities, and listening preferences. He prefers a simple and engaging app that helps him discover new songs, explore mood-based playlists, enjoy AI DJ sessions, and sing along through karaoke. He also enjoys discovering nearby live concerts and booking tickets easily. He is looking for an all-in-one music platform that makes every moment more enjoyable through personalized recommendations and seamless music discovery.

Goals

1. Discover songs and playlists that match his mood.
2. Explore new artists, genres, and trending music.
3. Get personalized music recommendations based on his listening preferences.
4. Enjoy interactive music experiences through AI DJ and karaoke.
5. Create and access favorite playlists easily.
6. Enjoy a seamless music-listening experience across different activities.

Pain Points

- Struggles to find songs that match his current mood and music preferences.
- Finds it difficult to discover new artists, genres, and personalized playlists in one place.
- Existing music apps lack an engaging, interactive listening experience with features like AI DJ and karaoke.

Prefrences

1. Personalized song and playlist recommendations.
2. Mood-based music selection for different activities.
3. Quick and easy access to favorite songs and playlists.
4. AI DJ features for a more interactive listening experience.
5. Karaoke features to sing along with favorite songs.
6. A smooth, user-friendly interface for discovering and enjoying music.
